

## Fund Finance Friday

### Make Your Voice Heard: LMA Fund Finance Intelligence Survey

January 24, 2025

Loan Market Association is excited to announce the launch of the LMA Fund Finance Intelligence Survey in collaboration with the Drawdown.

The fund finance market is rapidly gaining attention as its significance grows across the financial landscape. However, despite its increasing prominence, it remains a private and often misunderstood segment of the market. It is often described as a trillion dollar market, but the actual size of the market and its subsets is not clearly known – this perpetuates misconceptions around the market.

At the Loan Market Association, we are committed to **enhancing efficiency, liquidity, transparency and sustainability** in the market. We stated previously that we would work with our members to shine a light on the size, subsets and stakeholders in this market and that is what we are doing. **As the authoritative and independent voice of the EMEA loan markets**, we are launching the **LMA Fund Finance Intelligence Survey** – this is a key initiative designed, with the support of our members, to gather critical insights to drive a deeper understanding of the fund finance market. By engaging with private equity professionals, lenders, and advisers anonymously, we aim to uncover trends, challenges, and opportunities shaping this evolving sector.

**The data collected, which is anonymised and aggregated**, will culminate in the publication of **an annual, in-depth report, offering a comprehensive analysis of the fund finance market.**

This report will serve as an essential resource for the industry—helping all stakeholders navigate the market and informing strategic decisions.

Take part today and contribute to shaping a resilient future for fund finance. **At the LMA, we believe that every voice matters – make your voice heard.**
