

CADWALADER

London Programme 2016

# Women in the City 2016

## **Women in Leadership Debate:**

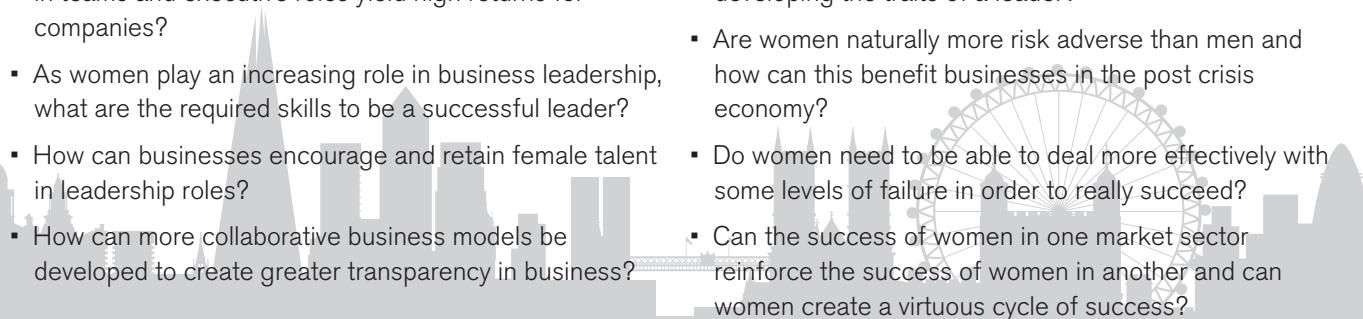

### **How Can Women Pave The Way As Future Leaders In The Post Financial Crisis Business World?**

Please join us for the breakfast launch of Cadwalader's Women in the City Programme, created to share thought-provoking and inspiring views on the challenges and opportunities that women face in today's business world.

Cadwalader has a strong commitment to developing our female talent across our global law firm. We are excited to host this new series of events devoted to promoting women in the business community.

We hope that the launch of our Women in the City Programme, which brings together a panel of high profile speakers, will provide some interesting perspectives on a range of issues surrounding women's progression into leadership roles while inspiring more women to consider and retain leadership roles within companies and other organisations.

### **Our panel will discuss the following questions:**

- How should we empower and create leaders to support the debate around the equality of women as well as men in the workplace?
  - Examining the facts: how does the presence of women in teams and executive roles yield high returns for companies?
  - As women play an increasing role in business leadership, what are the required skills to be a successful leader?
  - How can businesses encourage and retain female talent in leadership roles?
  - How can more collaborative business models be developed to create greater transparency in business?
  - Does the pathway to business leadership need to be more flexible if the economy is to benefit from the talents of women at the top?
  - Is embracing confidence one of the first steps to developing the traits of a leader?
  - Are women naturally more risk adverse than men and how can this benefit businesses in the post crisis economy?
  - Do women need to be able to deal more effectively with some levels of failure in order to really succeed?
  - Can the success of women in one market sector reinforce the success of women in another and can women create a virtuous cycle of success?
-
